Office Action Summary	Application No. 10/771,380	Applicant(s) OOI ET AL.	
	Examiner Stuart Hendrickson	Art Unit 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 8/23/07.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit: 1793

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) In claim 2, 'at a heating temperature' is unclear and poor grammar. The carbon is heating something else?

Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP '605.

The reference teaches pretreating a carbon to block pores. The pore distribution is not recited; applicant should show a difference. No differences are seen in the carbon or the effect of the treatment.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP '543.

The reference teaches contacting carbon with hot organic gas. Fig. 2 appears to show a wide initial pore distribution. No differences are seen in the carbon or the effect of the treatment.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ohsaki et al. 4458022.

The reference teaches contacting carbon with hot organic gas. The pore distribution is not recited; applicant should show a difference. No differences are seen in the carbon or the effect of the treatment. See col. 4 in particular.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Munzer et al. 3962129.

Art Unit: 1793

The reference teaches contacting carbon with hot organic gas. The pore distribution is not recited; applicant should show a difference. No differences are seen in the carbon or the effect of the treatment. See col. 3 in particular.

Applicant's arguments filed 8/23/07 have been fully considered but they are not persuasive.

Claim 1 requires closing micropores, which is what Ohsaki teaches. The other references appear to achieve the claimed effect, due to the similarity of the process. It is argued that '605 that no pores of 20A diameter remain. This (even if true, which it seems not to be) is not required by the claims. It is argued that '543 does not close micropores. However, it is deemed to do so, in view of the process it uses versus the claims. The claims do not require canisters. The alleged unexpected results have not been demonstrated.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
